FAX Cover Sheet

Date: February 6, 1995

To: Sunil Paul
Americal Online Inc.

FAX: 703/506-1942

Phone: 703/556-3734

From: Will Tuthill
WAIS Inc.

FAX: 415/327-6513

Phone: 415/617-0444

Pages Transmitted (including cover sheet): 3

Remarks:

Lightning Beta 1.0 is installed and running at AOL!

The items described below have been installed on the machine
thunder.wais.aol.com at AOL in the directory /services/production.

SOFTWARE

Executables and configuration files for running Lightning.
Contact than@wais.com 415-617-0446 for installation of
WAIS Server licence required for document search and retrieval.

Executables and configuration files for running NCSA HTTP Daemon.
These are not part of the deliverable but have been installed to
facilitate initial testing.

Source code for Rainman Feed Handler.

DOCUMENTATION

Documentation explaining installation, configuration, operation,
the directory and file structure and the currently known bugs is
installed in the directory /services/production/lightning/doc.
These files are in ASCII format.

SAMPLE DATA

Sample data has been provided in four areas to facilitate initial
testing efforts.

- 1) Default HTML page for entry into Lightning system. This page
provides 2 active URLs into the data described in 2) and 3)
below. The page also provides a placeholder for the data
described in 4) below.
- 2) WAIS Articles & Collections - a collection of articles and
collections demonstrating basic technical capabilities of
the Lightning system.
- 3) WAIS Lightning Search Page - a search page and indexes of the
data described in 2) above to demonstrate Lightning searching.
A WAIS Server licence must be installed for this feature to work.
- 4) Rainman Forms - a set of Rainman Plus scripts which generate a
collection of articles demonstrating 10 basic Rainman Plus forms.

NOTES

I've started the HTTP Daemon on thunder for Lightning Beta 1.0.
The URL is:

<http://thunder.wais.aol.com:1025>

I suggest starting the HTTP Daemon as root so it can use the default port 80. See the "Installation & Configuration" document for details on how to specify the port number and start the HTTP Daemon.

If you have questions or comments about the Beta 1.0 installation or the Lightning system, please let me know.

Regards,
Will
